

CRR CURRICULUM

A number of courses available through our national partners to meet some of your goals:

4165: Fire and Life Safety Educator I

Prerequisites: None

Contact Hours: 40

This course is designed to describe the role of today's educator and provides direction for planning fire and life safety education programs. It also provides the student with information on what motivates people to learn and how people learn differently. Successful completion will result in the student receiving IFSAC and Pro Board.

Accredited certification for NFPA 1035, Fire and Life Safety Educator I.

2183: Youth Firesetting Prevention and Intervention Level I

Prerequisite: None

Contact Hours: 16

This course is designed to empower the student with a broad understanding of the knowledge, skills, and abilities the Youth Firesetting Intervention Specialist I. This course is for the practitioner who provides services at the program delivery level. Topics include identifying the extent of the youth firesetter problems, intake, screening, disposition and follow up procedures, and youth educational intervention.

2184: Youth Fire Setting Prevention and Intervention Level II

Prerequisite: 2183

Contact Hours: 16

The course is designed for the employee responsible, or who will be responsible, for leading a youth firesetting prevention and intervention program. Topics include leading a youth firesetter prevention and intervention program, and program development and evaluation.

*Note – At the completion of both Youth Fire Setting Prevention and Intervention levels, the student meets the training prerequisite to challenge the Youth Firesetter Intervention Specialist IFASC/ProBoard certification challenge. This challenge is scheduled separate from the class and requires written examination and practical skills assessments.

5241: Fire and Life Safety Educator Quarterly Training

Prerequisite: None

Contact Hours: 6

This course is designed to address the job performance requirements outlined in NFPA 1035 (Fire and Life Safety Educator). In addition to providing continuing education for fire and life safety educators, updates on state programs will be given and there will be an opportunity for professional networking. This class is also appropriate for public educators who work with emergency medical service and law enforcement agencies. Class topics will be different each quarter. For more information, contact crr@lir.sc.gov.

5246: Introduction to NFIRS 5.0

Prerequisite: None

Contact Hours: 16

This course is designed to introduce the student to the use of standardized forms to achieve uniformity in his incident and activity reporting. This program is used specifically to support local fire service organizations, and assist them in providing data to management and decision makers, as well as to their state uniform fire reporting system. At a local level, NFIRS data can be used to:

- * Describe a community's fire problem
- * Support budget requests
- * Improve decision making for allocation of resources
- * Assist in planning for future fire protection
- * Help identify opportunities for scheduling non-emergency activities
- * Evaluate code enforcement programs
- * Identify target audiences for public fire education programs

ONLINE COURSES

1412-Carbon Monoxide Awareness (CO) Use enrollment key 17CO#Aware

Carbon Monoxide Awareness is an interactive online course brought to you by SC State Fire as well as the Jeffrey Lee Williams Foundation. This two module course is designed to create awareness over the necessity for carbon monoxide alarms as well as what can cause carbon monoxide to emit within our homes. For First Responders, this course demonstrates the soft skills and basic knowledge needed to diagnose and contain a carbon monoxide incident at a residence.

Q0843-Introduction to Community Risk Assessment

Curriculum: **Fire Prevention: Public Education**

CONTINUING EDUCATION UNITS: 0.4

Introduction to Community Risk Assessment (ICRA) (Q0843) is a new online self-study course that empowers the learner with a foundational understanding of the components, benefits, and processes of conducting risk assessments. As a prerequisite to the National Fire Academy (NFA) risk reduction program pathway, this course brings all students to the same level of understanding about risk assessments as they progress into more advanced courses. This course uses realistic scenarios to expose students to real-life situations. Students can expect to receive a foundation in vocabulary, working with demographic and community data, and interacting with stakeholders.

Q0841-Introduction to Strategic Community Risk Reduction

Curriculum: **Fire Prevention: Public Education**

CONTINUING EDUCATION UNITS: 0.4

Introduction to Strategic Community Risk Reduction (ISCRR) is a new online self-study course that empowers the learner with an understanding of what constitutes strategic community risk reduction (CRR). Students explore the history and evolution from fire prevention into all-hazards risk reduction. In addition to identifying the core components that build an effective CRR strategy, students learn how the process can help foster safe, healthy, prepared and resilient communities.

South Carolina - Essentials of Community Risk Reduction
