

CL^{USE} YOUR DOOR

BEFORE YOU DOZE

Fifty percent of home fire deaths happen between 11 p.m. and 7 a.m. Closing your doors BEFORE you go to bed helps keep you safe.

During a fire, a closed door can mean the difference between 1,000 degrees and 100 degrees.

FIRE SPREADS FAST

Because of modern synthetic materials, furniture, and construction, fire spreads faster than ever before. Closing doors helps stop the spread of fire.

If you have a home fire, as you leave, close each door behind you.
